

Proceedings of Graduation Theses submitted to
Department of Architecture, Faculty of Engineering, Hokkaido University
2004

Contents

Accepted in Nov.30,2004

| | | |
|---|---|------------|
| 【Structural Analysis】 | Supervisors:Y.Ishiyama,H.Takizawa,T.Asari | |
| SATO Tomohiko | Seismic Performance of Existing School Gymnasium Based on Seismic Diagnosis | Hokkaido 1 |
| TOYOMAKI Shingo | Influence of vertical earthquake ground motions on uplift and response of structures | 3 |
| 【Structural Performance】 | Supervisors:O.Joh,Y.Goto,T.Kitano | |
| TERAGUCHI Takuya | Experiments on Shear Resistance of SRC Interior Beam -Column Joints Improved Construction Works | 5 |
| NOZAWA Hiroyuki | Experiments on Performances of R/C Framed Shear Walls Strengthened with Carbon Fiber Grids | 7 |
| HAYASAKI Noboru | Experiments on Shear Resistance of Masonry Walls Framed with R/C Members | 9 |
| HAYASE Takashiro | Experiments on Anchorage Behavior of Steel Column Bases with T-Shape Steel Anchors -Performance of Pull-out Resistance- | 11 |
| MATSUURA Makoto | Fundamental Experimentson Bond Characteristics between Concrete and Steel Plates -Influence of Cross-sectional Shapes- | 13 |
| 【Structural Planning】 | Supervisors:M.Ueda,M.Kikuchi | |
| KIBATA Masaaki | Seismic Performance of The Administration-Bureau of Hokkaido University | 15 |
| KODURU Hiroya | Influence of Building Configuration on Seismic Load Distribution for Seismically-isolated Buildings | 17 |
| KOTSUKI Atsushi | Seismic Performance of The Hokkaido University Museum | 19 |
| 【Building Materials】 | Supervisors:O.Senbu,T.Hasegawa,T.Hasegawa | |
| AIKAWA Hazuki | Effects of exposure condition and kind of aggregate on frost resistance of high strength concrete | 21 |
| KAMO Yuta | A study on temperature changes related to deterioration of siding materials in external insulation buildings | 23 |
| HIRAI Yutaro | A Study on Play Environment of Children around Residences -Case of Sapporo City and Its Suburbs- | 25 |
| SAKON Keisuke | A study on effects of external insulation renewal of reinforced concrete buildings | 27 |
| 【Urban Planning And Design】 | Supervisors:H.Kobayashi,T.Setoguchi,T.Ozasa | |
| SHOJI Takao | Spacial Characteristics, Functions and Role of Urban Infrastructure According to the Transfiguration Process of the Area-In the Case of East Area in Sapporo City Center- | 29 |
| SUGAWARA Ikue | Formation Process of Collaboration System in Community Development Activities toward Self Management (In the Case of Eniwa City) | 31 |
| HOSOYACHI Maika | Deepening of Local Collaboration and Development of the Self-supported Activities in an Area, through the Sustained Process-In the Case of Kotoni Area in Sapporo City- | 33 |
| MASUDA Daisuke | The Actual Conditions about Implementation of Municipal Master Plans and the Current Issues toward their Efficiency -In the Case of Seventy Cities in Hokkaido- | 35 |
| MIZUSAWA Keita | Directivity of the Diversification Based on Land Use Needs inUrban Fringe of Local Cities (A Case Study in South Sorachi Region) | 37 |
| 【Urban Disaster Protection Planning】 | Supervisors:H.Kagami,N.Takai | |
| AIZAWA Kozue | Literature Survey of the Damage due to the Toya-Maru Typhoon of September, 1954 | 39 |
| HASEGAWA Junko | A study on Disaster Prevention Activity in Municipalities having Historical Districts -Survey through Official Web Page and Questionnaires to theMunicipalities- | 41 |
| MIWADA Goro | A Factor Analysis of Estimation Errors on Human Casualties due to Seismic Building Damages | 43 |
| SUDO Yoshiko | Literature Survey on Meiji Era Damaging Earthquakes in Hokkaido -Based on Unpublished Manuscript, "Zishin-Tsunami-Sonota-Chihen" Written by Tsunekichi Kohno- | 45 |

| | | |
|--|--|----|
| 【Environmental City Planning】 | Supervisors:A.Koshizawa | |
| ABE Yuka | On Planning and Development in Suburban Area in Yokohama City-A Specific Case of Higashi Totuka Kamishinano District- | 47 |
| SHIMAMURA Yasuaki | The Trend and Management of Scenic Zones in Tokyo Suburban Wards -A Case Study on Zenpukuji and Senzoku- | 49 |
| MISAKI Kaname | On the Change of Land use in Urbanization control area in Shizuoka -River improvement and Creation of public open spacein Asahata District- | 51 |
| UENO Natsuko | A Historical Research on the Planning and Development of Parks and Open Spaces in Asahikawa | 53 |
| 【Architectural History and Design】 | Supervisors:Y.Kado,M.Ishimoto | |
| OHTA Yuhsuke | A historical Study on Iai-Kindergarten building(1913) in Hakodate | 55 |
| KAWASAKI Junpei | A study on stone buildings around the quarrying in Kamikawa | 57 |
| SASAOKA Ayumi | A study on development and architectural composition of residential areas and houses on slope : the case of Tomioka, Otaru, as a town on slope | 59 |
| HIWATARI Keiko | A historical study of f re-prevention consciousness and the growth of city area in Obihiro analyed from Tokachi Mainichi's Newspaper information | 61 |
| YOKOCHI Susumu | A study on the recognition of historic properties in the university: the case of Sapporo campus of Hokkaido University | 63 |
| 【Planning and Design of Living Environment】 | Supervisors:T.Noguchi,M.Morishita | |
| KANESHIRO Naoshi | A Study of Dwelling Condition and Intention of Elderly People in the Local City of Hokkaido -Case of Kamikawa- | 65 |
| TAKANO Daichi | Concept of Cooperative Housing Based on Public Opinions -Case of Detached and Apartment Houses in Sapporo- | 67 |
| TONOI Nao | A Study of Outdoor Living and Environment of Elderly People in the Local City of Hokkaido -Case of Kamikawa- | 69 |
| NAKAMURA Masayuki | Possibility of Using Vacant Room in Detached Houses for Community -Case of Momijidai in Sapporo and Kitahiroshima- | 71 |
| HANAMOTO Tatsuro | A Study on Play Environment of Children around Residences -Case of Sapporo City and Its Suburbs- | 73 |
| LIU Yang | The Outdoor Environmental Condition of an Apartment Block -Case of Low, Mid and High-Rise Buildings in Central Areas of Sapporo- | 75 |
| 【Architectural Morphology】 | Supervisors:T.Oku,H.Hayasaka,S.Ikegami,S.Mori | |
| AKIYAMA Yuki | Study on influence of land use on urban temperature -Case study in Sapporo city- | 77 |
| OKAMOTO Akihiko | Relation between Various Open Park Spaces and Human Activities -Case Study of MOERE NUMA Park- | 79 |
| HIRAI Hiromasa | Underground Public Space Component Interaction with Human Activities -Case Study of TAIYOU NO HIROBA and POLE SQUARE at Sapporo City- | 81 |
| HOSOKAWA Mayo | Relevance of the Institution Program and Space Use Activities by Physically Disabled People | 83 |
| 【Architectural Environment】 | Supervisors:M.Enai,H.Hayama | |
| ISHIGAMI Eisuke | Statistical relationship between occurrence of house injures and occurrence factor | 85 |
| KODAMA Laura | On thermal and air environment of elementary schools inSapporo and subjects for their future | 87 |
| KOHATA Yuji | Experimental study on room air temperature distribution in offices | 89 |
| TAKAHASHI Ryota | Development of convenient commissioning method for general buildings -Estimation of energy saving effects in Hokkaido- | 91 |
