Proceedings of Graduate Thesis in 2007

Department of Architecture, Faculty of Engineering, Hokkaido University

Contents

Accepted on November 30, 2007

[Stuructural Analysi	s] Supervisors: Midorikawa, M., Takizawa, H., Asari, T.	
Kusakari Takayoshi	Estimation of Equivalent Damping Ratios of Structural Rocking Systems Using Simplified Models	1
Kudo Masahiro	Structure of Solutions Evidenced in Biaxial Eigenvalue Problems with References to the CQC Method	3
Fujita Youhei	Response of Building Structures with Uplift Subjected to Synthesized Earthquake Motion of Constant Energy Spectrum	5
Maruyama Yohei	Governing factors in the damping capacity of building structures determined by use of the Biggs' approximation	7
Yamazaki Ryohei	Actual Concrete Strength and Seismic Damage Prediction of Existing Reinforced Concrete Buildings in Hokkaido Based on Seismic Diagnosis	9
[Stuructural Planning	g] Supervisors: Ueda, M., Kikuchi, M., Koshikawa, T.	
Ishii Ken	Mechanical properties evaluation using discrete multi-spring model for seismic isolation bearings	11
Ohshima Mayu	Dynamic Nonlinear Analysis of Reinforced Concrete Beams and Columns including Bond Slip of Reinforcement	13
Okutsu Mitsutaka	Study on the dynamic properties of a tall building based on the long-term wind response observations	15
Hisada Masahiro	Material Nonlinear Analysis of Three-Dimensional RC Frame considering Bond-Slip of reinforcement	17
Matsuhiro Yushi	Compression Test Method of Concrete using Feedback Control	19
[Urban Disaster Prot	ection Planning] Supervisors: Sasatani, T., Takai, N.	
Kawabata Wataru	Excitation Characteristic of Short-period Seismic Waves during the 2007 Kuril Islands Earthquake Occuring in the Oceanic Plate	21
Shigefuji Michiko	Estimation of S-wave attenuation structure beneath northern Kyushu, Japan -Analysis of strong motion data from the 2006 Oita-ken-seibu Earthquake-	23
Yamazaki Asuka	A study on the safety countermeasure in after-school care facilities -Questionnaire survey in Sapporo-	25
[Architectural Histor	y and Design] Supervisors: Kado, Y., Ozawa, T., Ishimoto, M.	
Itoh Sakura	On the transition of barn built by Kaitakushi -A historical study on the cowshed in Sapporo (1875) and the second barn in Nanae (1881)-	27
Ohwaki Keita	A study on the architectural history and distinguishing of Tenrikyo shrines in Hokkaido	29
Kajita Hayuru	The process of the transition of a row of buildings along the former Sapporo Hondo at the east area of Sosei River in Sapporo-city	31
Sotokawa Maiko	A Study on Mebae-Kindergarten building (1937) of Sapporo Lutheran school	33
Teranishi Nobuhiro	A study on Minka at Kojoji of Nanto-city in Toyama	35
[Planning and Desig	n of Living Environment] Supervisors: Mori, S., Morishita, M.	
Koizumi Youri	A study of dwelling unit plans on apartments for elderly people in Sapporo	37
Sakai Yumi	The possibility of middle and low residential complexes in Maruyama area, Sapporo in the situation more high-rise buildings	39
Nakao Yuki	-Analysis on meanings of designing and supplying middle and low residential complexes- Aspects of the residential environment on outdoor activities in Yamada area, Kucchan, Hokkaido	41
[Urban Planning and	Design] Supervisors: Kobayashi, H., Setoguchi, T., Ozasa, T.	
Kato Chihiro	Mechanism of Social Capital Formation on Condition that the Regional Coalition -A Case Study on Seven Towns and Villages the Foot of Mt. Yotei-	43
Kon Takeshi	A Study of the Making Partnership in the Downtown based on the Activity of the TMO in the Ordinance-Designated City -In the Case of Sapporo City-	45
Takeya Takayuki	The Planning Viewpoint of Housing Environment toward the Community Development in the Local City	47
	-In Case of the HOPE Projects(Arita-Chou,Kaneyama-Chou,Miharu-Chou, and Yatsuo-Chou)-	

Minato Taro	The Direction for a Cooperation of Public University and the City through the Relationship between its Initial Background and Present Components -In the Case of Public Universities in Local Cities-	49
Minami Eiki	Results and Possibilities toward the Sustainable Revitalization of Regional Environment through the Improvement Process of the River -In the Case of the MOIZARI River-	51
Momiki Toshiaki	A Study on the Planning Factor and the Role According to a Change of Campus Planning -In Case of Campus Planning in California- (Graduated on June 29, 2007)	53
[Architectural Environment] Supervisors: Enai, M., Hayama, H., Kikuta		
Abe Yuhei	Measuring Method of Multiple Interzonal Airflows by Using Single Tracer Gas Technique during the Season of Small Temperature Differences between the Outdoor and the Indoor	55
Imai Ayako	Thermal Load Reduction Plan in Consideration of Summer Issues for One-story RC Buildings Installed External Insulation	57
Uchida Mao	Influence of Thermal Performance of Houses on Indoor Temperature Distribution and Annual Air Conditioning Load	59
Hase Satomi	Statistical Analysis of Disease Based on Ambulance Records in Sapporo	61
Yamanaka Keigo	Development of Primary Diagnosis Methods for Energy Savings Renovation of Existing Buildings	63
[Environmental City Planning] Supervisors: Koshizawa, A., Sakai, A.		
Kobayashi Rinako	Study on regeneration methods for three types of city park -Oodori,Nakajima,and Mikaho parks-	65
Shoda Kensuke	Master plans and developments of the north area of Sapporo station	67
Deguchi Yoshitom	O Study on improvement of Shimachi riverside park and its influence	69
Matsui Nozomi	Regeneration of community-based commercial area in Hakodate -Case of Nakajimarenbai area-	71
Morimoro Kae	Management and maintenance of Tonden windbreak forest -From agriculture forest to urban green-	73
[Architectural Morphology] Supervisors: Hayasaka, H., Mori, S.		
[Architectural Mor	phology] Supervisors: Hayasaka, H., Mori, S.	
[Architectural Mor Kimura Yuri	phology] Supervisors: Hayasaka, H., Mori, S. Characteristics of cognitive maps of the Sapporo Ekimae-dori Ave. area prior to completion of the underground pedestrian space	75
Kimura Yuri	Characteristics of cognitive maps of the Sapporo Ekimae-dori Ave. area prior to completion of	
	Characteristics of cognitive maps of the Sapporo Ekimae-dori Ave. area prior to completion of the underground pedestrian space -A study of effects on spatial cognition through the change of urban space structure- The relation between the change of utilization in spaces and the planning concept on Makomanai Elementary School.	75 77
Kimura Yuri	 Characteristics of cognitive maps of the Sapporo Ekimae-dori Ave. area prior to completion of the underground pedestrian space -A study of effects on spatial cognition through the change of urban space structure- The relation between the change of utilization in spaces and the planning concept on Makomanai Elementary School. Consideration of the issues concerning planning methods of quality countryside houses from the viewpoint of sustainability of the local community 	
Kimura Yuri Kobayashi Akiko	 Characteristics of cognitive maps of the Sapporo Ekimae-dori Ave. area prior to completion of the underground pedestrian space -A study of effects on spatial cognition through the change of urban space structure- The relation between the change of utilization in spaces and the planning concept on Makomanai Elementary School. Consideration of the issues concerning planning methods of quality countryside houses from the 	77
Kimura Yuri Kobayashi Akiko Shimizu Ikue	 Characteristics of cognitive maps of the Sapporo Ekimae-dori Ave. area prior to completion of the underground pedestrian space -A study of effects on spatial cognition through the change of urban space structure- The relation between the change of utilization in spaces and the planning concept on Makomanai Elementary School. Consideration of the issues concerning planning methods of quality countryside houses from the viewpoint of sustainability of the local community -A case study of Hirakigaoka housing development in Toyama- Residential design toward deinstitutionalization of child care institutions -A case study of Hope Meadows as an intentional intergenerational community- 	77 79
Kimura Yuri Kobayashi Akiko Shimizu Ikue Nonaka Shiho	 Characteristics of cognitive maps of the Sapporo Ekimae-dori Ave. area prior to completion of the underground pedestrian space -A study of effects on spatial cognition through the change of urban space structure- The relation between the change of utilization in spaces and the planning concept on Makomanai Elementary School. Consideration of the issues concerning planning methods of quality countryside houses from the viewpoint of sustainability of the local community -A case study of Hirakigaoka housing development in Toyama- Residential design toward deinstitutionalization of child care institutions -A case study of Hope Meadows as an intentional intergenerational community- 	77 79
Kimura Yuri Kobayashi Akiko Shimizu Ikue Nonaka Shiho [Structural Perform	Characteristics of cognitive maps of the Sapporo Ekimae-dori Ave. area prior to completion of the underground pedestrian space -A study of effects on spatial cognition through the change of urban space structure- The relation between the change of utilization in spaces and the planning concept on Makomanai Elementary School. Consideration of the issues concerning planning methods of quality countryside houses from the viewpoint of sustainability of the local community -A case study of Hirakigaoka housing development in Toyama- Residential design toward deinstitutionalization of child care institutions -A case study of Hope Meadows as an intentional intergenerational community- nance] Supervisors: Goto, Y., Kitano, A. Experimental Study on Shear Resistance of Confined Masonry Walls	77 79 81
Kimura Yuri Kobayashi Akiko Shimizu Ikue Nonaka Shiho [Structural Perform Inbe Takuya	Characteristics of cognitive maps of the Sapporo Ekimae-dori Ave. area prior to completion of the underground pedestrian space -A study of effects on spatial cognition through the change of urban space structure- The relation between the change of utilization in spaces and the planning concept on Makomanai Elementary School. Consideration of the issues concerning planning methods of quality countryside houses from the viewpoint of sustainability of the local community -A case study of Hirakigaoka housing development in Toyama- Residential design toward deinstitutionalization of child care institutions -A case study of Hope Meadows as an intentional intergenerational community- nance] Supervisors: Goto, Y., Kitano, A. Experimental Study on Shear Resistance of Confined Masonry Walls - Effect of Boundary Column Depth and Strengthening Method -	77 79 81 83
Kimura Yuri Kobayashi Akiko Shimizu Ikue Nonaka Shiho [Structural Perform Inbe Takuya Kawachi Yu-ki	Characteristics of cognitive maps of the Sapporo Ekimae-dori Ave. area prior to completion of the underground pedestrian space -A study of effects on spatial cognition through the change of urban space structure- The relation between the change of utilization in spaces and the planning concept on Makomanai Elementary School. Consideration of the issues concerning planning methods of quality countryside houses from the viewpoint of sustainability of the local community -A case study of Hirakigaoka housing development in Toyama- Residential design toward deinstitutionalization of child care institutions -A case study of Hope Meadows as an intentional intergenerational community- nance] Supervisors: Goto, Y., Kitano, A. Experimental Study on Shear Resistance of Confined Masonry Walls - Effect of Boundary Column Depth and Strengthening Method - Finite Element Analysis on Shear Behavior of Confined Masonry Walls Experimental Study on Behavior of RC Beams anchored to thin Wall by 90-degree Hook	77 79 81 83 85
Kimura Yuri Kobayashi Akiko Shimizu Ikue Nonaka Shiho [Structural Perform Inbe Takuya Kawachi Yu-ki Maeno Kotaro	Characteristics of cognitive maps of the Sapporo Ekimae-dori Ave. area prior to completion of the underground pedestrian space -A study of effects on spatial cognition through the change of urban space structure- The relation between the change of utilization in spaces and the planning concept on Makomanai Elementary School. Consideration of the issues concerning planning methods of quality countryside houses from the viewpoint of sustainability of the local community -A case study of Hirakigaoka housing development in Toyama- Residential design toward deinstitutionalization of child care institutions -A case study of Hope Meadows as an intentional intergenerational community- nance] Supervisors: Goto, Y., Kitano, A. Experimental Study on Shear Resistance of Confined Masonry Walls - Effect of Boundary Column Depth and Strengthening Method - Finite Element Analysis on Shear Behavior of Confined Masonry Walls Experimental Study on Behavior of RC Beams anchored to thin Wall by 90-degree Hook	77 79 81 83 85
Kimura Yuri Kobayashi Akiko Shimizu Ikue Nonaka Shiho [Structural Perform Inbe Takuya Kawachi Yu-ki Maeno Kotaro [Building Material	Characteristics of cognitive maps of the Sapporo Ekimae-dori Ave. area prior to completion of the underground pedestrian space -A study of effects on spatial cognition through the change of urban space structure- The relation between the change of utilization in spaces and the planning concept on Makomanai Elementary School. Consideration of the issues concerning planning methods of quality countryside houses from the viewpoint of sustainability of the local community -A case study of Hirakigaoka housing development in Toyama- Residential design toward deinstitutionalization of child care institutions -A case study of Hope Meadows as an intentional intergenerational community- nance] Supervisors: Goto, Y., Kitano, A. Experimental Study on Shear Resistance of Confined Masonry Walls - Effect of Boundary Column Depth and Strengthening Method - Finite Element Analysis on Shear Behavior of Confined Masonry Walls Experimental Study on Behavior of RC Beams anchored to thin Wall by 90-degree Hook	777 79 81 83 85 87
Kimura Yuri Kobayashi Akiko Shimizu Ikue Nonaka Shiho [Structural Perform Inbe Takuya Kawachi Yu-ki Maeno Kotaro [Building Material Oga Keiko	Characteristics of cognitive maps of the Sapporo Ekimae-dori Ave. area prior to completion of the underground pedestrian space -A study of effects on spatial cognition through the change of urban space structure- The relation between the change of utilization in spaces and the planning concept on Makomanai Elementary School. Consideration of the issues concerning planning methods of quality countryside houses from the viewpoint of sustainability of the local community -A case study of Hirakigaoka housing development in Toyama- Residential design toward deinstitutionalization of child care institutions -A case study of Hope Meadows as an intentional intergenerational community- mance] Supervisors: Goto, Y., Kitano, A. Experimental Study on Shear Resistance of Confined Masonry Walls - Effect of Boundary Column Depth and Strengthening Method - Finite Element Analysis on Shear Behavior of Confined Masonry Walls Experimental Study on Behavior of RC Beams anchored to thin Wall by 90-degree Hook	 77 79 81 83 85 87 89
Kimura Yuri Kobayashi Akiko Shimizu Ikue Nonaka Shiho [Structural Perform Inbe Takuya Kawachi Yu-ki Maeno Kotaro [Building Material Oga Keiko Koseki Junpei	Characteristics of cognitive maps of the Sapporo Ekimae-dori Ave. area prior to completion of the underground pedestrian space -A study of effects on spatial cognition through the change of urban space structure- The relation between the change of utilization in spaces and the planning concept on Makomanai Elementary School. Consideration of the issues concerning planning methods of quality countryside houses from the viewpoint of sustainability of the local community -A case study of Hirakigaoka housing development in Toyama- Residential design toward deinstitutionalization of child care institutions -A case study of Hope Meadows as an intentional intergenerational community- hance] Supervisors: Goto, Y., Kitano, A. Experimental Study on Shear Resistance of Confined Masonry Walls - Effect of Boundary Column Depth and Strengthening Method - Finite Element Analysis on Shear Behavior of Confined Masonry Walls Experimental Study on Behavior of RC Beams anchored to thin Wall by 90-degree Hook s] Supervisors: Senbu, O., Hasegawa, T. Survey on deterioration of the Hokkaido University "Kenchikutoh" building Survey of the stain on external wall of elementary schools in Sapporo Effects of production conditions on the frost resistance of external tile using special extra high	 77 79 81 83 85 87 89 91
Kimura Yuri Kobayashi Akiko Shimizu Ikue Nonaka Shiho [Structural Perform Inbe Takuya Kawachi Yu-ki Maeno Kotaro [Building Material Oga Keiko Koseki Junpei Nakano Takafumi	Characteristics of cognitive maps of the Sapporo Ekimae-dori Ave. area prior to completion of the underground pedestrian space -A study of effects on spatial cognition through the change of urban space structure- The relation between the change of utilization in spaces and the planning concept on Makomanai Elementary School. Consideration of the issues concerning planning methods of quality countryside houses from the viewpoint of sustainability of the local community -A case study of Hirakigaoka housing development in Toyama- Residential design toward deinstitutionalization of child care institutions -A case study of Hope Meadows as an intentional intergenerational community- nance] Supervisors: Goto, Y., Kitano, A. Experimental Study on Shear Resistance of Confined Masonry Walls - Effect of Boundary Column Depth and Strengthening Method - Finite Element Analysis on Shear Behavior of Confined Masonry Walls Experimental Study on Behavior of RC Beams anchored to thin Wall by 90-degree Hook s] Survey on deterioration of the Hokkaido University "Kenchikutoh" building Survey of the stain on external wall of elementary schools in Sapporo Effects of production conditions on the frost resistance of external tile using special extra high early strength cement Effects of water distribution and transportation in high strength concrete on the frost deterioration Effects of alternative immersion and exposure on the frost resistance of concrete based on the	 77 79 81 83 85 87 89 91 93
