

Proceedings of Graduate Thesis in 2008

Department of Architecture, Faculty of Engineering, Hokkaido University

Contents

Accepted on November 28, 2008

[Structural Analysis]	Supervisors: Midorikawa, M., Takizawa, H., Asari, T.	
Azumaishi Hideki	Seismic Performance of Existing Reinforced Concrete Buildings and Steel Gymnasiums in Hokkaido Based on Seismic Diagnosis	1
Tanaka Yasutaka	Inelastic Behavior of Buckling-restrained Braces Using Steel Mortar Planks by Finite Element Analysis -Comparison of Cyclic Loading Test Results with Numerical Analysis for Different Core Plate Lengths-	3
Hasegawa Tatsuya	Hysteretic Characteristics and Plastic Deformation Capacities of Yielding Base Plates of Response-control Buildings with Columns Allowed to Uplift	5
Hayashi Akihiko	Dynamics of systems with compositely differing capacities of damping	7
[Structural Environment]	Supervisors: Ueda, M., Kikuchi, M., Koshikawa, T.	
Matsumora Makoto	Structural Performance of Precast Prestressed Concrete Beam with Elasto-plastic Dampers of Beams-ends	9
Okagawa Satoshi	Structural performance of the Sapporo television tower	11
Fujita Yukinori	An Analytical Model for Square Lead-rubber Bearings under Large Shear Deformations	13
Muramatsu Shinya	Failure Mechanism and Strain Softening Characteristics of Concrete Subjected to Uniaxial Compression	15
[Urban Disaster Protection Planning]	Supervisors: Sasatani, T., Takai, N.	
Okazaki Yuka	Wide-area Distribution Characteristics of Strong Ground Motions from the Outer-rise Earthquakes Occurring in the Philippine Sea and Pacific Plates	17
Kobayashi Masahiro	A Study on Strong Ground Motion's from 2008 Iwate-ken-chubu Earthquake (Mj6.8)	19
Saito Takahiro	Seismic Response of the Furano Basin Based on Observed Data	21
Yamasaki Maiko	A Case Study on Current Disaster Prevention Situation of "Reconstructed Elementary School"	23
Oji Yosuke	A Study on Refuge Area Allocation for Evaluation of Regional Earthquake Disaster Mitigation Capacities - A Case Study of Sapporo City -	25
[Architectural History and Design]	Supervisors: Kado, Y., Ozawa, T., Ishimoto, M.	
Ishikawa Yousuke	A study on Tasaku Murakami, contractor in Kuriyama, Hokkaido	27
Shinohara Kouta	A historical study on Kuroda house (1926) in Sapporo	29
Muto Yusuke	A historical study on modern temples in Sapporo	31
Yokota Jun	A study on building process of St.Michael(Episcopal)Church in Sapporo	33
Watanabe Hiroka	A study on reinforced concrete apartments in the central area of the company town, Oji Paper Co.Ltd. Tomakomai factory in Hokkaido	35
[Planning and Design of Living Environment]	Supervisors: Mori, S., Morishita, M.	
Kusakari Dai	Consideration of the Relationship Between Restrictions and Behavior Settings in Public Space	37
Aiba Natsuko	Public Aspects of Shopping Centers as Regional Infrastructure: A Case Study of Tsukashin Commercial Complex	39
Otaki Haruka	Aspects of the Residential Environment on the Marginal Village from the Viewpoint of Social Capital: Based on Life Story Interviews in Nishikawa-cho, Shakotan, Hokkaido	41
Morita Satoko	Analysis of Actual Conditions of the Planning and its Utilization on Pediatrics Clinics: Investigation into Existing Facilities in Ishikari, Hokkaido	43
[Urban Planning and Design]	Supervisors: Kobayashi, H., Setoguchi, T., Ozasa, T.	
Ishiguro Suguru	Outcome of Promotion of Rural Residence Act Based on the Life Realities of Community -In Case of Tobetsu-cho and Yuni-cho-	45

Oinuma Takafumi	Consideration for the Process of the Actualization and Future Development of Master Plan in Local Small Town -In Case of Nakashibetsu Town in Hokkaido-	47
Chiba Takuya	Issues and Possibility toward the Community Based Management of the Neighborhood District by the Collaboration of PTA and Regional Community -In Case of Hujinosawa Elementary School District in Sapporo City-	49
Nagaya Satomi	A Study on Landscape Characteristics of HOKKAIDO through Topological Analysis of Photographs in Magazines	51
Masuda Shoko	Process of Making Principles and Activity Development of Rural Community Planning Through the Exchange between Rural District and City -In the Case of Biei town in Hokkaido-	53
Watanabe Norihiro	Direction for Evolution to Living Environment Policy development in rural fishing village region based on the resident's problem and possibility recognitions -A Case Study on Shakotan Town in Hokkaido-	55
[Architectural Environment]		Supervisors: Enai, M., Hayama, H., Kikuta, K.
Ito Masaki	A Study for Estimation Method of Solar Radiation Load on Each Floor in Skylighted Void Space	57
Kato Maiko	A Study on Grasp of the Present Condition of Thermal Comfort and Air Quality in Eco-School	59
Kamazawa Yuki	Analysis of Drowning and Submersion while Bath-tub using the Vital Statistics Date	61
Kousai Satomi	Analytic Study on Hygrothermal Behavior in the Crawl Space Insulated on Foundation Wall	63
Yoshida Takao	Verification on Indoor Environment for Highly Insulated and Airtight and Passive Ventilation House	65
[Environmental City Planning]		Supervisors: Koshizawa, A., Sakai, A.
Ishizuka Tetsuya	Study on transition of urban structure in the north east area of Hamamatsu station	67
Isobe Youichi	Study on 1950's urban redevelopment and changing process in Utsunomiya central retail area - Introducing fireproofed and townhouse structure-	69
Okawa Eriko	Study on riverside landscape and highrise residential development problem in Niigata City	71
Oguchi Takeyoshi	Study on establishment of recreational function in urban river development in Sapporo	73
Mizuno Takumi	Study on establishment and transition process of Kairakuen in Sapporo	75
[Structural Performance]		Supervisors: Goto, Y., Kitano, A.
Okada Daisuke	Experimental Study on Effect of Shear Strength of Beam-Column Joints on Shear Behavior of SRC Frames	77
Kakihara Takuya	Experimental Study on Behavior of RC Beam and Slab Anchored to Wall by 90-degree Hook	79
Kimura Megumi	Finite Element Analysis on Effect of Joint Behavior on Shear Resistance of Confined Masonry Walls	81
Konakade Takuya	Experimental Study on Deciding Factor for Column Failure Mode of SC Column - S Beam Frames	83
Hayashi Takuya	Experimental Study on Shear Resistance of Confined Masonry Walls with an Opening - Influence of Brick Strengths -	85
Houken Mayumi	Experimental Study on Shear Resistance of Confined Masonry Walls - Influence of Failure Type of RC Columns and Brick Strength -	87
[Building Materials]		Supervisors: Senbu, O., Hasegawa, T.
Nakagawa Jin	Effects of materials and test conditions on the frost resistance of high strength concrete	89
Abe Kanako	Rain cleaning effects of various external finishing materials in cold region	91
Asakura Torao	Effects of water absorption properties of mortar on the frost resistance	93
Ishizawa Hiroyuki	A study on transition of system and construction method of concrete masonry and effective cover depth in terms of durability	95
Ninomiya Yuki	Effects of properties of coarse aggregate on frost resistance of concrete	97
