

Proceedings of Graduate Thesis in 2009

Department of Architecture, Faculty of Engineering, Hokkaido University

Contents

Accepted on November 30, 2009

[Structural Analysis]	Supervisors: Midorikawa, M., Takizawa, H., Asari, T.	
Tanno Mao	Comparison of Seismic Performance among Retrofit Methods of Existing Reinforced Concrete Buildings in Hokkaido Based on Seismic Diagnosis	1
Matsuura Yoshiki	Dynamic and Hysteretic Characteristics of Controlled Rocking of Steel-Frames with Replaceable Energy Dissipating Fuses	3
Muraki Taisuke	Effect of Vertical Component of Earthquake Motions on the Energy Response of Building Structures with Foundation Uplift	5
[Structural Environment]	Supervisors: Kikuchi, M., Koshikawa, T.	
Kitayama Shoma	An Analytical Model for Lead-Rubber Bearings under Large Shear Deformation including the influence of Compression Modulus Distribution	7
Oinuma Azumi	Prediction of High-Damping Rubber Isolation Bearing Behavior including Property of Hardening	9
Takatani Mami	Axial Compression Analysis of Concrete Based on Integral-type Nonlocal Damage Theory	11
Fujiwara Mizuho	Seismic Performance of Sapporo Archives Museum	13
[Urban Disaster Protection Planning]	Supervisors: Sasatani, T., Takai, N.	
Okubo Takeshi	A Study on Activating the Residents Organization for Disaster Prevention by using Human Resources of University	15
Sawae Hisanori	Seismic Response of Northern Hokkaido during the 2003 Tokachi-oki Earthquake	17
Fukui Tomoya	A Study on PGV Amplification at KiK-net Sites in Hokkaido	19
Mimura Wataru	Long-period Seismic Response in the Sapporo Metropolitan Area during the 2003 Tokachi-oki Earthquake	21
Morita Yasuhiro	Nonlinear Soil Response during the 2007 Niigata-ken-chuetsu-oki Earthquake	23
[Architectural History and Design]	Supervisors: Kado, Y., Ozawa, T., Ishimoto, M.	
Saito Yuki	A study on Matsuhisa house(1918) in Memuro, Hokkaido	25
Jinno Shota	A transition of the town scape along Ekimae-dori north of Oh-dori in Sapporo before WW II - Reconstruction Study of the Building Elevations in the late Taisho and the early Showa period-	27
Yamazaki Tomoe	A Study of Munafuda (Wooden Tag) in Hokkaido	29
Yamaya Manabu	Perception of Space Extension Described in the Articles by Architects - A Case of Japanese Houses since 1970's -	31
Yonemoto Takeshi	A study on the Facilities and Plot Planning of Yoichi Distillery in Hokkaido, the Nikka Whisky Distilling Co., Ltd.	33
Kogure Ryuta	A Study on architects and architectural engineers, born in the 1930s, in Hokkaido After World War II	35
[Planning and Design of Living Environment]	Supervisors: Mori, S., Morishita, M.	
Urano Hiromi	A Basic Study of Publicness of the Public-sector Facility Converted from the Private-sector Building	37
Ogawa Yasufumi	Possibilities of Utilizing the Closed School for Art events toward Community Revitalization in Hilly and Mountainous Areas: Focusing on Echigo-Tsumari Art Triennial in Tokamachi, Niigata	39
Tasai Tomomi	A Basic Study of the Nursing Room from the Viewpoint of Gender Equality : Based on the Actual Conditions of Commercial Facilities in Sapporo	41
Nakamura Ayumu	Analysis of the issues on University Campus Planning from the Viewpoint of CPTED: Comparison of Crime Prevention Strategy in 7 Universities and Survey on the User Feelings about Hokkaido University	43
Hasebe Hisato	Evaluation of the Design Competition and the Planning on Iwamizawa Station Complex based on the Actual Conditions	45

[Urban Planning and Design]		Supervisors: Kobayashi, H., Setoguchi, T., Ozasa, T.
Ichijo Yasunori	Actual Situation in Use of Station Square after Redevelopment through Downtown Revitalization - In the Case of Redevelopment Project of Hakodate Station -	47
Takahashi Yukihiko	Results and Possibilities toward Sustainable Revitalization of Region through Transfiguration of the District and Resident's Activities after Preparation of the River - In the Case of Saiwai District, Eniwa City and the Moizari River -	49
Nagashima Kenji	Consideration of the Planning Framework for Urban Revitalization through the Creative City - In the Case of Ordinance-Designated Cities and Prefectural Capitals -	51
Nomura Takeshi	Planning Directivity of Regional Resources toward Revitalization of Rural Area	53
Yamada Kensuke	The Present Situation and Subjects in the Demands of Aged Residents and Community Support in Fishing Village - A Case Study of Yobetsu District, Shakotan Town -	55
[Architectural Environment]		Supervisors: Hayama, H., Kikuta, K.
Kakimoto Junko	Indoor Environment and Energy Consumption of Convenience Stores in Cold and Snowy Regions	57
Kimura Yuki	A Performance Verification between before and after Installing Gas Engine Driven Heat Pump Air Conditioning System in Cold Snowy Regions	59
Kenmochi Keisuke	Effects of Displacement Ventilation for the Large-scale Printing Factory	61
Naganuma Junichi	A Performance Evaluation for Highly Insulated and Airtight House with PV Generation Systems	63
[Environmental City Planning]		Supervisors: Koshizawa, A., Sakai, A.
Okamoto Yohei	A study on influences of waterfront redevelopments in the district of Minatomotomachi in Kobe	65
Tanaka Rizumu	A study on development process of disaster prevention park on previous national public land	67
Nagata Kyohei	A study on the management of the street market in the central area of Kochi City	69
Yamaguchi Kaori	Transition of townscape of the Buddhist temples district in the central area of Niigata	71
[Structural Performance]		Supervisors: Goto, Y., Kitano, A.
Ebihara Shota	Development of Constitutive Law for Joint Behavior in Masonry Walls based on Experimental Studies of Brick Masonry Units	73
Kawasumi Keishi	Evaluation of Anchorage and Shear Resistance Performance of RC Exterior Beam-Column Joint applied New Mechanical Anchorage	75
Sugai Mami	Experimental Study on Shear Resistance of Confined Masonry Walls - Effects of Joint Strength between Bricks and Column Failure Type -	77
Tateshima Kimiyuki	Effect of Welding Wire Mesh on Shear Resistance of Steel Concrete Column	79
Miyauchi Jun-ichi	Experimental Study on Shear Resistance of Confined Masonry Walls with Low Strength Column - Effect of Opening on Wall Behavior -	81
[Building Materials]		Supervisors: Senbu, O., Hasegawa, T.
Yamada Shuto	Effects of drying and wetting conditions on the frost resistance of high strength concrete	83
Kato Shingo	Proposal of prediction method for change of brightness difference of various exterior finishing materials under natural conditions	85
Shimizu Mariko	Proposal of oven drying shrinkage method using drying indicator	87
Suzuki Yuhei	Application of various test method on the evaluation of frost resistance of baked bricks	89
Tomita Shuhei	Effects of alternating immersion on frost resistance of concrete using recycled coarse aggregate	91
