

Proceedings of Graduate Thesis in 2010

Department of Architecture, Faculty of Engineering, Hokkaido University

Contents

Accepted on November 30, 2010

[Structural Analysis]	Supervisors: Midorikawa, Asari, T.	
Ujiie Daisuke	Effect of Phase Characteristics of Input Earthquake Motions on Seismic Response of Building Structures with Foundation Uplift	1
Ohotomo Hironori	Maximum Seismic Response Estimation of Controlled Rocking Steel Frames with Energy Dissipating Fuses and PT Wire Anchorage	3
Sato Keisuke	Seismic Performance and Seismic Damage Prediction of Existing Reinforced Concrete Buildings in Hokkaido Based on Seismic Diagnosis	5
Naruo Wataru	Seismic Energy Response of Reduced-scale Steel Frames with Uplift Columns Based on 3-D Shaking Table Tests	7
Wakayama Takuya	Estimation of the Number of Buckling Mode about Weak-axis of Buckling-Restrained Braces Based on Cyclic Loading Tests	9
[Structural Environment]	Supervisors: Kikuchi, M., Koshikawa, T.	
Suzuki Yoriko	Analysis for the Behavior of Full-scale Lead Rubber Bearings under Severe Condition Including the Influence of Compression Modulus Distribution	11
Tai Saori	Structural Characteristics on Higashihonganji temple Hakodate Betsuin	13
Tanimoto Kazuki	Seismic Response of Isolated Buildings Considering Nonlinearity of Superstructure	15
Matsubishi Yuto	Test Program for Horizontal Biaxial Loading on High-Damping Rubber Bearings	17
Miyano Tomohiro	Section Analysis of the Precast-Prestressed Concrete Beam with Unbonded Tendons	19
[Urban Disaster Protection Planning]	Supervisors: Okada, S., Takai, N.	
Endo Tomoya	Proposal of Active Evacuation System with Infrared Sensor Having a High Affinity for Ubiquitous Computing Environment	21
Okajima Hideki	-Calculation Algorithm for an area of furniture fallen- Estimation for Shallow Underground Structure in Urakawa Residential Area Damaged by the 2003 Tokachi-oki Earthquake	23
Ogawa Ai	Disaster Prevention Scheme and Social Infrastructure Development in National Spatial Strategies -Elucidation of the deliberation process through the practice of text mining on the minutes of the National Land Council-	25
Sawada Kosuke	Comparison of Strong Motion Data between Two Kushiro-oki Earthquakes of the Similar Hypocenters, Magnitudes and Mechanisms	27
Miyahara Yuji	A Study on Excitation Characteristics of Long-Period Ground Motion in Sapporo Urban Area with the General-Purpose Earthquake Simulator	29
[Architectural History and Design]	Supervisors: Kado, Y., Ozawa, T., Ishimoto, M.	
Otsuji Sadanori	Design Concept of Japanese Houses with Diagonal Wall after the World War II	31
Kusabuka Takahiro	A Study on Construction Specifications in Preservation Repair Reports of Important Cultural Properties in Hokkaido	33
Konno Yuta	A Study on History and Design of the Former Soma Residence in Hakodate	35
Goto Natsumi	A Study on Transition Process and Spatial Composition of Buildings and Paths in Susukino District, Sapporo	37
Saito Junko	A Study on Accommodations for Royal Visits in Hokkaido from 1876 to 1954	39
Miyaniishi Yuya	A Historical Study on Abe House in Sapporo	41

[Planning and Design of Living Environment]		Supervisors: Mori, S., Morishita, M.
Ariyoshi Ko	A Basic Study of Personalization in the Internet Café	43
Kayanuma Kumiko	Analysis of Contemporary Views on Nature in Evaluation of Nature Oriented Built Environment	45
Sugawa Yasuko	Actual Conditions and Issues on Aquarium Facility Management focusing on its Body Characteristics	47
Yamashita Wakana	A Consideration of Public Meaning of EKI-NO-YADO HIRAFU Converted from the Uninhabited Station A Study of Publicness of Complex Reused or Converted Uninhabited Stations	49
[Urban Planning and Design]		Supervisors: Setoguchi, T., Ozasa, T.
Satoh Kouya	The Spatial Block Design of Downtown District with Snow and Wind Simulations in Snowy and Cold Cities -The New Urban Design Approaches with Environmental and Energy Assessment-	51
Nagao Miyuki	A Study on the Planning Approaches for Compact City Depend on the Citizen's Intent -Case Study on Downsizing Urban Area of Yubari City in Hokkaido-	53
Hayashibara Mari	The Landscape Structure on Immigrant Development Grid Cities -Case Study on Naganuma and Biei Town in Hokkaido-	55
Matsuda Kou	An Urban Design Proposal for "Wooden Compact Cities" in Medium Scale Local Cities -In Case of the Downtown Areas of Eniwa City and Iwamizawa City in Hokkaido-	57
[Architectural Environment]		Supervisors: Hayama, H., Kikuta, K.
Omi Yoshiki	Performance Verification of Highly Insulated and Airtight Houses in Consideration of Summer Issues	59
Kaneko Ryohei	Energy Conservation of Independent Convenience Stores in Cold and Snowy Regions	61
Takano Choichi	Energy Consumption Survey in University Buildings	63
Futawatari Naoki	Cooling Characteristics of Computer and Consideration of Energy Conservation Measures in a Data Center	65
Hamada Mari	Disease Attacks of the Respiratory System Based on Population Survey Report	67
[City Planning]		Supervisors: Koshizawa, A., Sakai, A.
Tani Satoru	The issues of the renovation and the developing process of the first large scale public housing complex "Tokiwadaira"	69
Cho Yasunaka	Study on effects of commercial promotion in the urban formation of Yokohama Chinatown	71
Nishimura Yu	Study on the transition of renovation concept of Sapporo municipal public housing	73
Hayashi Daiki	Study on the transition of conservation and management of historical canal in Urban Area Kanazawa	75
[Structural Performance]		Supervisors: Goto, Y., Kitano, A.
Kobayashi Yumie	Anchorage Performance of Beam Bars with Anchor Plate in RC Exterior Beam-Column Joint	77
Tanabe Shohei	Finite Element Analysis of Confined Masonry Walls considering Boundary Behavior of Masonry Units	79
Tsuzaki Kazuhiro	Effect of column steel section shape on seismic performance of steel beam-SC column joint	81
Murai Shintaro	Experimental Study on Seismic Performance of Confined Masonry Walls -Effect of Joint and Bricks Strength and Column Shape -	83
Yamazaki Hironobu	Relation between Shear and Anchorage Failure of RC Exterior Beam-Column Joint using 90-degree Hooked Beam Bars	85
[Building Materials]		Supervisors: Senbu, O., Hasegawa, T.
Imahara Keiji	Effects of various finishing materials on water transportation properties in concrete	87
Otani Aya	Study on estimation methods of the Critical Degree of Saturation of siding materials using one side freezing test	89
Shimada Hiroki	Study on inspection method of joint mortar strength for thin joint mortar concrete block masonry construction system	91
Ninomiya Naomi	Effects of pollution conditions and surface properties of finishing coating materials on soiling of external wall caused by rainfall	93
Yamazaki Mai	Study on frost resistance of concrete applied blast-furnace slag fine aggregate	95
Yamashita Keisuke	LCC Estimation of reinforced concrete building using stainless steel bar considering the galvanic corrosion	97
