If you would like to delay the on-line publication of your dissertation for over a year

Date: _____

To the Dean of Graduate School of Engineering:

Application for Approval of Delay in Online Publication for Doctoral Dissertation Full Text

I understood those who were conferred the doctoral degree are required to release the full text of their doctoral dissertation. However, I hereby request that my doctoral dissertation be published online in summary form only, as it is not possible to publish the full text on the Internet within one year of degree conferment for the reasons outlined below.

I will notify you as soon as the reasons for the delay request are resolved so that the full text can be published.

1. Reasons for request to delay publishing of full text on the Internet

In the case there is limit for the period of delay, the full text of the dissertation will be published in the university repository automatically after the expected date of resolution for delay request reasons which you write below or the limit for the period of delay.

(Reason about submission to an academic journal or publication as a book)

Because of the regulation of the academic journal to which I have submitted the dissertation, the period I cannot publish the dissertation online continues more than one year from the date of degree conferment (maximum of 3 years).

Journal name () Date of submission ()

The dissertation will be submitted to an academic journal which prohibits multiple publications. (maximum of 3 years).

Journal name () Scheduled date of submission ()

The dissertation will be published as a book (maximum of 3 years, however, when it is actually published, delay of online publication for maximum of ten years from the publication date of the book is possible).

(Reason about the rights belong to others)

The dissertation includes a specific individual's information (date of resolution is undecided).

The dissertation includes the others' work, and consent about online publishing was not obtained although printing to the dissertation was accepted. (date of resolution is undecided).

(Reason about patent and so on)

Because of application for patent or a utility model, publication of the full text on the Internet would have negative consequences for me until more than one year after degree conferment (date of resolution is undecided).

The dissertation has contents that cannot be published on the Internet for reasons related to physical limitations such as expression based on three-dimensional shapes (date of resolution is undecided).

There is an unavoidable reason not mentioned above. (maximum of 3 years).

*Write down the specific reason.

2. Expected date of resolution for delay request reasons

Date: _____ (dd/mm/yyyy) Undecided

(* Maximum of 3 years from April 1 after degree conferment)

(* As a matter of principle, we can not allow the expected date to be set as "undecided".)

Applicant's name: _____ Seal*

Expected date of degree conferment: _____ (dd/mm/yyyy)

Supervisor approval <small>*Unnecessary if the applicant receives doctorate by dissertation</small>	Seal*

Prevention of Misconduct during Research Activities

1. Code of conduct for scientists at Hokkaido University

Science and scientific research are intended to be applied for the sake of peace, security and the fair and rich future of human society, and research activities based on the development of science and technology and the independent judgment of scientists may only achieve social recognition on the premise of trust and a mandate from society. Therefore, scientists must always ensure transparency of their research activities and accountability to society and be aware of the strict and high ethical principles expected of them.

2. Research Misconduct

Misconduct is nothing less than behavior against the ethical values of researchers. It distorts the quality and purpose of such ethical principles and upsets normal scientific communication within the scientific community. Specifically, typical examples of research misconduct include fabrication and falsification of obtained data or results, plagiarism of other person's research findings or other information, duplicate publication of the same research findings, and inappropriate authorship by not appropriately indicating the authors of referenced research papers.

If research findings that have been honestly obtained by truly appropriate scientific methods turn out to have been mistaken, it is not considered misconduct.

- ① Fabrication : Fabrication is making up of data, research findings or other information that do not exist.
- ② Falsification : Falsification is manipulation of research materials, equipment or processes, such as using data and research findings in a way that is not a true and correct representation of the actual results of the study.
- ③ Plagiarism : Plagiarism is the misappropriation of other researchers' ideas, analysis methods, data, research findings, papers or words without the explicit permission of the relevant researcher or an appropriate indication of where the material comes from.

(An act of so-called copy and paste falls into this type of misconduct. Regarding duplicate publication, if appropriate references are not provided, it is considered self-plagiarism.)

3. Current Measures Against Misconduct

Article 15 of the Hokkaido University Regulations on Academic Degrees stipulate that doctoral dissertations must be published on the Internet. Once your dissertation has been published, other people may evaluate it in various ways using computers or other tools. This must be kept in mind, because Internet plagiarism of students who have to write papers has become a social problem in recent years. Supervisors may check papers using software that can detect misconduct to prevent such behavior.

4. Penalties Against Misconduct

Students engaged in misconduct may be suspended or expelled. In such a case, not only is graduation postponed, but tuition payments also increase during the extra time and scholarships may be suspended or cancelled. Their supervisors are also questioned about their supervisory responsibilities and may be penalized for their share in not preventing the misconduct.

* Quotations without providing appropriate references and copy & paste from the Internet, books and papers comprise apparent violations of copyright and are subject to criminal charges.
